EQUIPMENT LIST *(continued)*

TECHNICAL NOTES

DVDs and Computer Files are acceptable media for projection. A computer/laptop must be rented or provided by Licensee. When using a computer/laptop for presentations, it is strongly recommended to turn off any screensavers, standby or hibernation modes.

If the Licensee needs additional visual components, it should be noted that the Premises' projectors are equipped for S-VHS, Composite and VGA signals. Switching between different signals during a presentation is not recommended and may require the rental of additional equipment.

The Premises' projection screens are HD compatible with a screen ratio of 16:9. Projections created with a 4:3 ratio will be projected with letter boxing to the right and left of the image.

The Licensor strongly recommends that the Licensee conduct a technical rehearsal prior to commencement of the site-use license.
